(54) Title: GENE EXPRESSION IN BIOLOGICAL CONDITIONS

(57) Abstract: The present invention relates to a method of predicting the prognosis of a biological condition, such as bladder cancer, in animal tissue, wherein the expression of genes is examined and correlated to standards. The invention further relates to the treatment of the biological condition and an assay for predicting the prognosis. In particular, the invention concerns gene expression in epithelial tissue, such as urinary bladder under both normal and abnormal conditions.
